

# Notice Watermain Work

South East Area  
Watermain Replacement

## WATERMAIN WORK TO OCCUR IN YOUR AREA

You are receiving this notification because watermain work is to occur in your area and your residence will be affected. The following streets will have watermain replacement: **Portland Avenue**

## PHASED APPROACH

Due to the length of this project, the watermain work will be broken into smaller phases. Your residence will start to see watermain activity on **Monday 8/15/2022**, with service connections beginning shortly thereafter.

## WATER ACCESS

For the duration of the watermain work, temporary water access will be set up for all impacted residents. By setting up a temporary system, the contractor can replace components of the permanent underground system without disrupting service to your home.

The contractor will begin the set up of the temporary water access on **Monday 8/15/2022**, with service connections beginning shortly thereafter.

**In order to set up the temporary water, the contractor will need access to an outside water spigot. The contractor will then need to complete the set up and check it is operating correctly from inside the home. The resident shall then run water from the lowest exterior spigot until a consistent stream of clear water comes out to flush the line.**

The contractor and the inspector will work with each resident to allow the contractor to complete the temporary water access set up. These temporary water services will be visible blue pipe installed at each home. This above ground system is a live pressurized water system, please avoid hitting this pipe with your lawn mower. If you notice a leak in the blue pipe, please call the contact numbers listed on this page immediately.
